The GREAT JACKSBY

Weekend Extravaganza

WHAT IS NEUROFIBROMATOSIS (NF)?

NF is a complex genetic disorder and cancer predisposition syndrome that causes tumors to grow on nerves anywhere in the body, including the brain and spinal cord. NF has a wide-range of complications that include gliomas, chronic pain, blindness, deafness, cardiovascular issues, learning disabilities and cancer. It is more prevalent than cystic fibrosis, Duchenne Muscular Dystrophy, Huntington's Disease and Tay-Sachs Disease *combined*. As a spontaneous mutation accounts for over half of NF cases, anyone's next child can be born with NF.

WHAT IS CURENFWITHJACK?

CureNFwithJack is a non-profit organization whose mission is to find an effective treatment or cure for NF through the funding of research. Donations to CureNFwithJack provide seed money to NF researchers and research-based NF entities for the most promising preclinical research and clinical trials. **100% of CureNFwithJack proceeds are dedicated to our singular passion – research.** No dollars are used to support Jack's expenses or patient care.

MISSION IMPACT

Highlights of CureNFwithJack's impact include: investing in a multi-million dollar initiative for the first ever worldwide NF glioma analysis; accelerating a clinical trial which resulted in the *first ever* FDA-approved drug for the reduction of certain NF tumors; and co-funding a project in the new frontier in NF research – gene therapy.
